MECHANICS OF COMPOSITE MATERIALS

Narasingh Deep is a PhD Scholar of Department of Mechanical Engineering under the supervision of Dr. Punyapriya Mishra (Associate Professor) in Veer Surendra Sai University of Technology, Burla, Odisha, India. His broad area of research is composite materials and in particular his work centered around carbon based nanocomposite. He has been studying the thermo-mechanical behavior of the bipolar plate in Proton Exchange Membrane Fuel Cell (PEMFC). He has published research papers in many reputed journals and international conferences. Mr. Deep and Dr. Punyapriya Mishra have been awarded the prestigious “Institution Award” from the Institution of Engineers (India) in February 2018.
