

4th International Symposium on
Energy **C**hallenges & **M**echanics
- working on small scales

11-13 August 2015
Aberdeen, Scotland, UK

Speaker of Session 02

PHOTOVOLTAICS

Gregory Welch is an Assistant Professor of Chemistry and Canada Research Chair at Dalhousie University in Halifax, Nova Scotia. He obtained a B.Sc. in Chemistry from the University of Calgary in 2003 and worked in the laboratories of Tristram Chivers and Warren Piers. He earned his Ph.D. at University of Windsor in 2008 under the supervision of Douglas Stephan where he developed the concept of Frustrated Lewis Pairs. He then moved to UC-Santa Barbara, where he studied organic solar cells as a NSERC postdoctoral fellow with Guillermo Bazan. His research interests focus in the area of Printed Electronics and Solar Cells, where he is developing new functional materials.
