

4<sup>th</sup> International Symposium on  
**E**nergy **C**hallenges & **M**echanics  
- working on small scales

11-13 August 2015  
Aberdeen, Scotland, UK

### Invited Speaker of Session 03

### HYDROGEN GENERATION AND STORAGE

Nicolas GLANDUT, 36 years old, obtained his Ph.D. in electrochemistry from the Grenoble Institute of Technology in 2004. In 2001, he graduated from the same institute with an engineer's degree in electrochemistry. After a postdoctoral stay with Professor Majda at the University of California Berkeley in 2005 and 2006, he returned to France to join the European Ceramics Center in Limoges, as a *Maître de conférences* (equivalent to Associate Professor). His research now focuses on electrochemistry and laser irradiation of non-oxide ceramics, in order to develop new systems for energy storage and conversion.
