

4<sup>th</sup> International Symposium on  
**E**nergy **C**hallenges & **M**echanics  
- working on small scales

11-13 August 2015  
Aberdeen, Scotland, UK

## Speaker of Session 02

### PHOTOVOLTAICS

Scot Wheeler  
Department of Chemistry and Centre for Plastic  
Electronics  
Imperial College London  
London, UK

Scot is a PhD student under the supervision of Professor James Durrant and Professor Jenny Nelson at the Centre for Plastic Electronics, Imperial College London. Scot completed an MSci in Chemistry at the same institution, where his research project concerned the electrode interlayer stability of organic photovoltaics towards oxygen and water. His current research is focused on the application of transient optoelectronic techniques to study the competition between energetics and recombination kinetics in organic photovoltaics and more recently organic-inorganic lead halide perovskite photovoltaics.
