

4th International Symposium on
Energy **C**hallenges & **M**echanics
- working on small scales

11-13 August 2015
Aberdeen, Scotland, UK

Speaker of Session 24

ENERGY IMPACT OF SUPERCONDUCTORS

Stefan Guénon is a postdoctoral research fellow at the Eberhard Karls University of Tübingen working on Nano Atomoptics. He received his PhD from the University of Tübingen in the year 2011. His thesis was about superconducting THz generators and magneto-optics. After his PhD he moved to the University of California, San Diego, where he investigated Mott-insulators and superconducting vortex dynamics at the Department of Physics and the Center for Advanced Nanoscience. Additionally, he was involved in the search for new superconductors for energy and power applications.
