Speaker of Session 15:

RENEWABLE ENERGY TECHNOLOGY

Yong DING is a professor at Chongqing University, China, a member of China Green Building Council, and Executive vice Secretary-General, Chongqing Green buildings Council. He is also an executor of the National Green Buildings Base (Southwest China).

As an active researcher in green building technologies, especially renewable energy use in buildings, he is currently director of the China “Twelfth Five Year” National Technology Support Project and was director of more than 30 projects supported by China/local government. The total fund is over 5 million CNY. His research contributes to the establishment of renewable energy monitoring platform in Chongqing as well as the construction and development of national renewable energy application demonstration cities and towns.

Author of over 50 publications, including 7 local standards. His series of books: Application of Ground Source Heat Pump Technology in Chongqing, Architecture Application of Solar Thermal Technologies in Chongqing, explore the key issues on renewable energy use in buildings.
